

## *Van der Velden® ATLANTIC Rudder*

The Van der Velden® ATLANTIC rudder is a proven design with ample manoeuvring performance and good course keeping capabilities.

The Van der Velden® ATLANTIC rudder has no moving parts, which significantly increases its life-span. The profile design and rudder shape can be adapted to suit specific vessel requirements. Examples include minimising drag and cavitation danger for high-speed vessels, or reducing noise and vibration levels for comfort.

If you require a more advanced manoeuvring performance, Van der Velden® Marine Systems supplies a hollow profile with a higher lift, compared to a NACA profile. Already cost effective to purchase, the Van der Velden® ATLANTIC rudder is also renowned for its low maintenance costs.

### BENEFITS ►

- No moving parts
- Long life-span
- Value for money
- Low maintenance costs
- Low resistance due to slim profile
- Profile and rudder shape can be adapted to suit specific vessel application
- Short delivery times

### CHOOSE TO INTEGRATE

*Van der Velden® Marine Systems is a single source supplier and can deliver complete manoeuvring packages including rudders, rudder trunks, streamline bodies, steering gear and steering gear foundations.*

*Customers and yards alike benefit from an easy to install and integrated solution, a unified overall design and one project coordinator for the manoeuvring system.*

# SMART MARITIME SOLUTIONS

## APPLICATIONS ►

- Van der Velden's ATLANTIC rudders are especially suitable for yachts and commercial vessels.
